ABSTRACT

The first systematic national count of degree output by race is presented for use by institutional curriculum planners to help give students the opportunity to make realistic choices in career planning. Included are summary tables of degree production by level (doctoral, master's, bachelor's, and first-professional degrees awarded); degree changes by field and level in the South; degrees awarded by race; distribution of black degree recipients among fields; and percentages of distribution of black degree recipients by field and level in predominantly white and predominantly black institutions. (BD)

FOREWORD

In recent years, we have witnessed substantial progress in both educational and career opportunities for minorities. Since the beginning of this decade, black enrollment at the postsecondary level has increased at twice the rate of white enrollment nationally, and in the first six years of the Seventies total black enrollment doubled. At the same time, the movement toward affirmative action in our society has greatly widened job prospects, and today's black college graduates, especially those in fields where minorities are underrepresented, find their college degrees increasingly marketable.

This report draws upon the first systematic national count of degree output by race and provides a benchmark whereby future progress in closing the gap in educational attainment between races can be measured. The data should be useful to institutional curriculum planners whose task it is to make sure that students are given the opportunity to make realistic choices in career planning.

There are indications that institutions and minority students are not adjusting rapidly enough to the expanding opportunities available. Significant differences do exist in the patterns of preparation between blacks and whites. There are also differences in the outputs of predominantly black and predominantly white institutions. To the extent that these differences represent a lag between the career expectations of an earlier era and the realities of the present, they can be corrected. Peering into the future for indications of changing manpower needs and of consequent demands in educational preparation may be somewhat more challenging but should become increasingly possible with progress in the refinement of statistical documentation.

Winfred L. Godwin
President

INTRODUCTION

Degree Output in the South, 1975-76 is the fourth volume in a series of reports which the Southern Regional Education Board (SREB) began releasing on a regular basis with information on the 1970-71 academic year. This year's report institutes a number of changes from previous editions. Detailed summaries of degree output by all of the subfields of the Higher Education General Information Survey (HEGIS) classification are provided for the United States and the SREB region in Tables 1 and 2. Detailed data for each of the SREB states have been omitted in this report but are available in computer print-out form from the research unit of SREB. Included in the 1975-76 report are summary tables of degree output for the United States, the SREB region, and each of the SREB states by the 24 major program classifications. For the first time, racial breakdowns are included. Tables 3 and 4 provide these data by program area and race for both predominantly white and predominantly black institutions.*

---

*Data in this report are taken from the computer tape of the HEGIS survey of Degrees and Other Formal Awards Conferred between July 1, 1975, and June 30, 1976. Predominantly black institutions are those with greater than 50 percent total black enrollment in the fall of 1976. For a list of these institutions readers are referred to the companion SREB report, Black Enrollment in Higher Education: Trends in the Nation and the South (1978). Table 1 and introductory Tables A - E are for the 50 states and the District of Columbia. The racial data found in Tables 3 and 4 are for the "Aggregate United States" which includes outlying areas.

Degree Production by Level: 1964-1976

Tables A, B, C, and D update information first presented in the introduction to the 1974-75 Degree Output report. A number of significant trends continued:

+++ Doctoral degree production in the South continued to grow at a faster rate than in the nation. While degree output remained unchanged at the national level, production of doctorates in the South increased by nearly 4 percent over the previous year (see Table A).

Table A

DOCTORAL DEGREES AWARDED, 1964-1976

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	2,147	14.8		1.5	14,490		2.3
1970	5,542	18.6		2.1	29,866		2.8
1971	6,057	18.9	9.3	2.2	32,107	7.5	2.8
1972	6,529	19.6	7.8	2.2	33,363	3.9	2.7
1973	6,623	19.0	1.4	2.1	34,777	4.2	2.7
1974	6,810	20.1	2.8	2.0	33,816	-2.8	2.6
1975	7,226	21.2	6.1	2.1	34,083	0.8	2.6
1976	7,491	22.0	3.7	2.1	34,064	-0.1	2.6

+++ The number of master's degrees granted in the South in 1975-76 increased 12 percent over levels the year before. This rate of growth was greater than for any other degree level and was

nearly twice the national rate. SREB states now account for one of every four master's degrees granted each year compared to about one of every six in 1964 (see Table B).

Table B

MASTER'S DEGREES AWARDED, 1964-1976

	SREB States				United States		
Year	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	18,219	18.0		12.8	101,122		16.4
1970	40,470	19.3		15.6	208,291		19.6
1971	46,177	20.0	14.1	16.7	230,509	10.7	20.2
1972	52,739	21.0	14.2	17.9	251,633	9.2	20.7
1973	58,542	22.1	11.0	18.7	263,371	4.8	20.7
1974	64,456	23.2	10.1	19.4	277,033	5.2	21.1
1975	70,706	24.2	9.7	20.7	292,450	5.6	22.4
1976	79,101	25.4	11.9	22.4	311,771	6.6	23.4

+++ Bachelor degree production in both the South and the nation showed little change over 1975 levels. Due to the rapid growth of other degree levels, bachelor's degrees as a percent of total degrees continued a long-term trend of decline (see Table C).

+++ The number of first professional degrees granted annually in the South continued to grow rapidly after a pause in 1975. Nationally, production increased 12 percent over levels in 1975 (see Table D).

Table C

BACHELOR'S DEGREES AWARDED, 1964-1976

Year	SREB States				United States

Table D

FIRST PROFESSIONAL DEGREES AWARDED, 1964-1976

Year	SREB States				United States		
	Number	Percent of U.S.	Annual Percent Increase	Percent of Total Degrees	Number	Annual Percent Increase	Percent of Total Degrees
1964	9,183	22.1		6.5	41,637		6.7
1970	9,080	25.4		3.5	35,724		3.4
1971	9,514	25.1	4.8	3.4	37,946	6.2	3.3
1972	10,666	24.6	12.1	3.6	43,411	14.4	3.6
1973	12,718	25.4	19.2	4.1	50,018	15.2	3.9
1974	14,154	26.3	11.3	4.3	53,816	7.6	4.1
1975	14,273	25.5	0.8	4.2	55,916	3.9	4.3
1976	15,394	24.6	7.9	4.4	62,649	12.0	4.7

Table E summarizes the degree output by level for each of the SREB states and highlights the changes which have taken place during the past five years. Again, the table illustrates the rapid growth of graduate level education in the South relative to national growth rates. Master's degree production has grown at twice the national rate since 1970-71; doctoral degrees, at nearly four times the national rate. Among the states, increases in master's degree production ranged from a low of 30 percent in Louisiana to a high of 242 percent in South Carolina. At the doctoral level, annual degree production dropped in two states, Alabama and Louisiana, while increasing 101 percent in Florida.

Degree Changes by Field and Level: The South

Tables F and G present the changes in degree output by field at each of the four degree levels for the SREB region.

Bachelor's Degrees: Four major undergraduate fields--foreign languages, letters, mathematics, and the social sciences--show reduced numbers of degree recipients in 1976 as compared to 1971 levels. When compared to the levels of the previous year, the decline in the foreign languages was the most precipitous among those programs with significant levels of degree output.

By far, the greatest increase in degree production at the bachelor's level during the past five years has come in the field of public affairs: a 329 percent increase over 1971 levels. Public affairs includes such subfields as community services, public administration, parks and recreation management, and law enforcement and correction. Interdisciplinary studies,

Total First Professional	15,394		

which registered the largest increase in 1976 over 1975 levels, showed a 171 percent increase over levels of five years ago. Degree output in computer and information sciences, health professions, and communications also increased significantly over 1971 levels, with all of these fields at least doubling in the number of annual recipients.

Master's Degrees: As with the bachelor's level, the fields of public affairs, computer and information sciences, interdisciplinary studies, and the health professions had the greatest increase in output over 1971 levels. In addition, degree output in the fields of architecture and home economics more than doubled from 1971 levels. In the field of education, the number of master's degrees granted in 1976 was up 98 percent over 1971 levels.

Foreign languages, letters, mathematics, and the physical sciences all showed declines during the 1971-76 period.

Doctoral Degrees: Due to small numbers of recipients in some fields at the doctoral level, examining percentage increases alone can be misleading. Education, with a 67 percent increase over levels in 1971, has had the largest numerical increase during the period--up 906 degrees since 1971. Theology, with less than 100 degrees annually in 1971, has increased 354 percent to a total of 449 degrees awarded in 1976. Several fields with small numbers of recipients have increased significantly: public affairs, law, library science, and interdisciplinary studies.

The most significant declines from 1971 levels have come in the fields of engineering, physical sciences, mathematics, and biological sciences.

First Professional Degrees: All of the first professional fields in the South showed increased output in 1976 over 1971 levels. The number of M.D.s

increased by 51 percent; dental graduates, by 49 percent; recipients of law degrees, by 82 percent. In 1971 the South did not graduate a student in the field of osteopathic medicine; in 1976 there were 48 degree recipients in this field.

Degrees Awarded by Race

For the first time with the 1975-76 HEGIS survey, racial breakdowns were provided for degrees awarded. Tables 3 and 4, pages 41-72, present degree output for blacks, whites, and "other"* for each of the 24 major program areas, the four levels of degrees, and two categories of institutions (predominantly white and predominantly black). Data are provided for the United States, the SREB region, and each of the 14 SREB states.+

Table H presents the total degrees awarded black students by levels for the United States, the region, and each of the SREB states. Nationally, 59,297 bachelor's degrees were awarded to black students in 1975-76, accounting for 6.4 percent of the total bachelor's degrees awarded that year. Blacks received 20,351 master's degrees (6.5 percent of all master's) and 1,213 doctorates nationally (3.6 percent of the total). At the first professional level, 2,694 degrees were awarded blacks, representing 4.3 percent of the total first professional degrees. Blacks accounted for 11.5 percent of the total population of the United States in 1975.

---

*"Other" includes nonresident aliens: American Indians or Alaskan natives; Asians or Pacific islanders; and Hispanics.

+The sums of the racial breakdowns in Tables 3 and 4 differ slightly from the totals found in Table E and Tables 1 and 2. Nationwide, there were 15 institutions which did not provide racial breakdowns of degrees, but did provide totals. For SREB states, the total number of bachelor's degrees reported was 0.6 percent higher than the sum of the racial breakdowns.

Table H

DEGREES AWARDED TO BLACK STUDENTS BY LEVEL,

In the South, blacks accounted for 11.5 percent of all bachelor's degrees awarded, compared to their 18.8 percent representation in the region's population. At the master's level, blacks made up 11.3 percent of the degree recipients. The 320 doctorates awarded blacks in the 14 SREB states in 1975-76 represented 4.3 percent of the doctorates awarded that year. At the first professional level, blacks accounted for 4.7 percent of the total.

Distribution of Black Degree Recipients Among Fields

The distribution of black graduates in the South among fields of study differs significantly from that of whites. At the bachelor's level, nearly one of every three black degree recipients was in the field of education, compared to one of every five whites (see Table J). The proportion of degrees awarded blacks in the fields of business and management, mathematics, public affairs, the social sciences, and home economics was also higher than that found among whites.

Significant underrepresentation in certain fields is also evident when we examine distributions of degree recipients by race and field. Only 0.2 percent of all black degree recipients at the bachelor's degree level received their degrees in architecture compared to 1.1 percent of whites. The percentage distribution among whites was at least double that among blacks in the fields of agriculture, engineering, fine and applied arts, physical sciences, theology, and interdisciplinary studies.

At the master's level, the dominance of teacher education as a field of study for blacks is evident. Reflecting the singularity of employment opportunity for blacks in the past, three of every four black recipients

of master's degrees in the South in 1975-76 were in the field of education (compared to one of every two whites). Given the dominance of teacher education as a field of study, all other fields, with the exception of public affairs, showed smaller percentages than whites.

At the doctoral level, the predominance of education is also clearly evident (see Table K). Of the 320 doctoral degrees awarded in 1975-76 to blacks, 239, or 74.7 percent, were awarded in the field of education (compared to 30.4 percent of all doctorates awarded whites). Only in two other fields, biological sciences and social sciences, were more than 10 degrees awarded blacks.

At the first professional level, the distribution of blacks and whites among fields shows similar patterns.

Predominantly White and Predominantly Black Institutions

In 1975-76 predominantly black institutions in the South remained the major suppliers of black graduates, despite their less than majority share of black enrollment. The 19,843 bachelor's degrees awarded black students in predominantly black institutions (see Table 3, page 41) represented 69 percent of all bachelor's degrees received by blacks in the South. Predominantly black four-year institutions accounted for about 62 percent of all black undergraduates four years earlier (1972).

At the graduate level, black institutions accounted for 46 percent of all graduate degrees granted blacks in 1976, and 47 percent of all first professional degrees awarded blacks.

Degree output in predominantly black institutions also reflects some of the differences in fields of study which were noted earlier. Table L compares the distribution of black graduates among fields of study in predominantly black and predominantly white institutions.

A number of observations can be made from these data. Both the curriculum offerings in the two types of institutions and the preference of black students have shaped the outcomes. Table L reveals that blacks in black institutions are more likely to receive their bachelor's degrees in the field of education than blacks in white institutions. This appears to reflect the teacher education tradition of the traditionally black institutions.

Table L

PERCENTAGE DISTRIBUTION OF BLACK DEGREE RECIPIENTS BY FIELD AND LEVEL IN PREDOMINANTLY WHITE AND PREDOMINANTLY BLACK INSTITUTIONS 1975-76

There are other noteworthy differences as well. Black institutions produce substantially smaller proportions of black bachelor's degree graduates than do white institutions in the health professions and the public affairs field, but significantly greater percentages in the fields of biological sciences, business and management, engineering, and social sciences.

At the graduate level, we also observe the higher proportions of black students in black institutions earning degrees in education than their counterparts in white institutions (nearly eight of every ten graduate degrees awarded in black institutions are in the field of education). But, black institutions award higher proportions of their graduate degrees in the physical and social sciences than is the case among black students in white institutions. As with the bachelor's level, significantly lower percentages of black students in predominantly black institutions are earning graduate degrees in the health professions and the field of public affairs than are found among black students in white institutions.
